Soheila Kamrani

Production of a device which is able to convert the environment humidity to drinking water on the base of evaporation-condensation mechanism (distillation)

Dear Mrs.

March 15, 2008

I would hope that infinite prosperity be with you.

I'm very happy to send you my invitation letter.

It is my pleasure to inform you that our association will hold Korea International Women's Invention Exposition 2008 (KIWIE) together with Korea International Women Inventions Fair and Forum at the COEX exhibition hall in Seoul for the period from May 8(Thursday) to May 10(Saturday), 2008.

KIWIE is the first event for international women inventors in the world. About 300 women inventors from 20 countries or so will participate in the event in order to share information with others and know new trends of technology and promote new ideas of invention. The event will be able to enhance women inventors' prestige and competitiveness through authoritative awards.

The Forum, scheduled on May 9, will address "Plan of sustainable development for international women inventors and business women through intellectual properties, accompanied by worldwide prestigious speakers. The Forum will deliver international relationships and supports for international women inventors and discuss annual plans for these and adopt an agenda for 21st world women's invention.

KIWIE and Forum will be co-hosted by World Intellectual Property Organization (WIPO) and Korean Intellectual Property Office (KIPO).

Inventions by women are unique. They change our life more convenient and more beautiful.

For this event, which will be a global festival for women inventors, we will make every effort to ensure its success.

"Women inventors, let us see your passion and creativity in Seoul Korea.

You will meet a new opportunity in a wider world."

Please take my Seasons' Greeting and wish you a Happy New Year.

Sincerely yours,

Han, Mi-Young

The president of Korea Women Inventors Association
